The parts of a flower

There are four main parts of a plant.

Can you guess what they are?

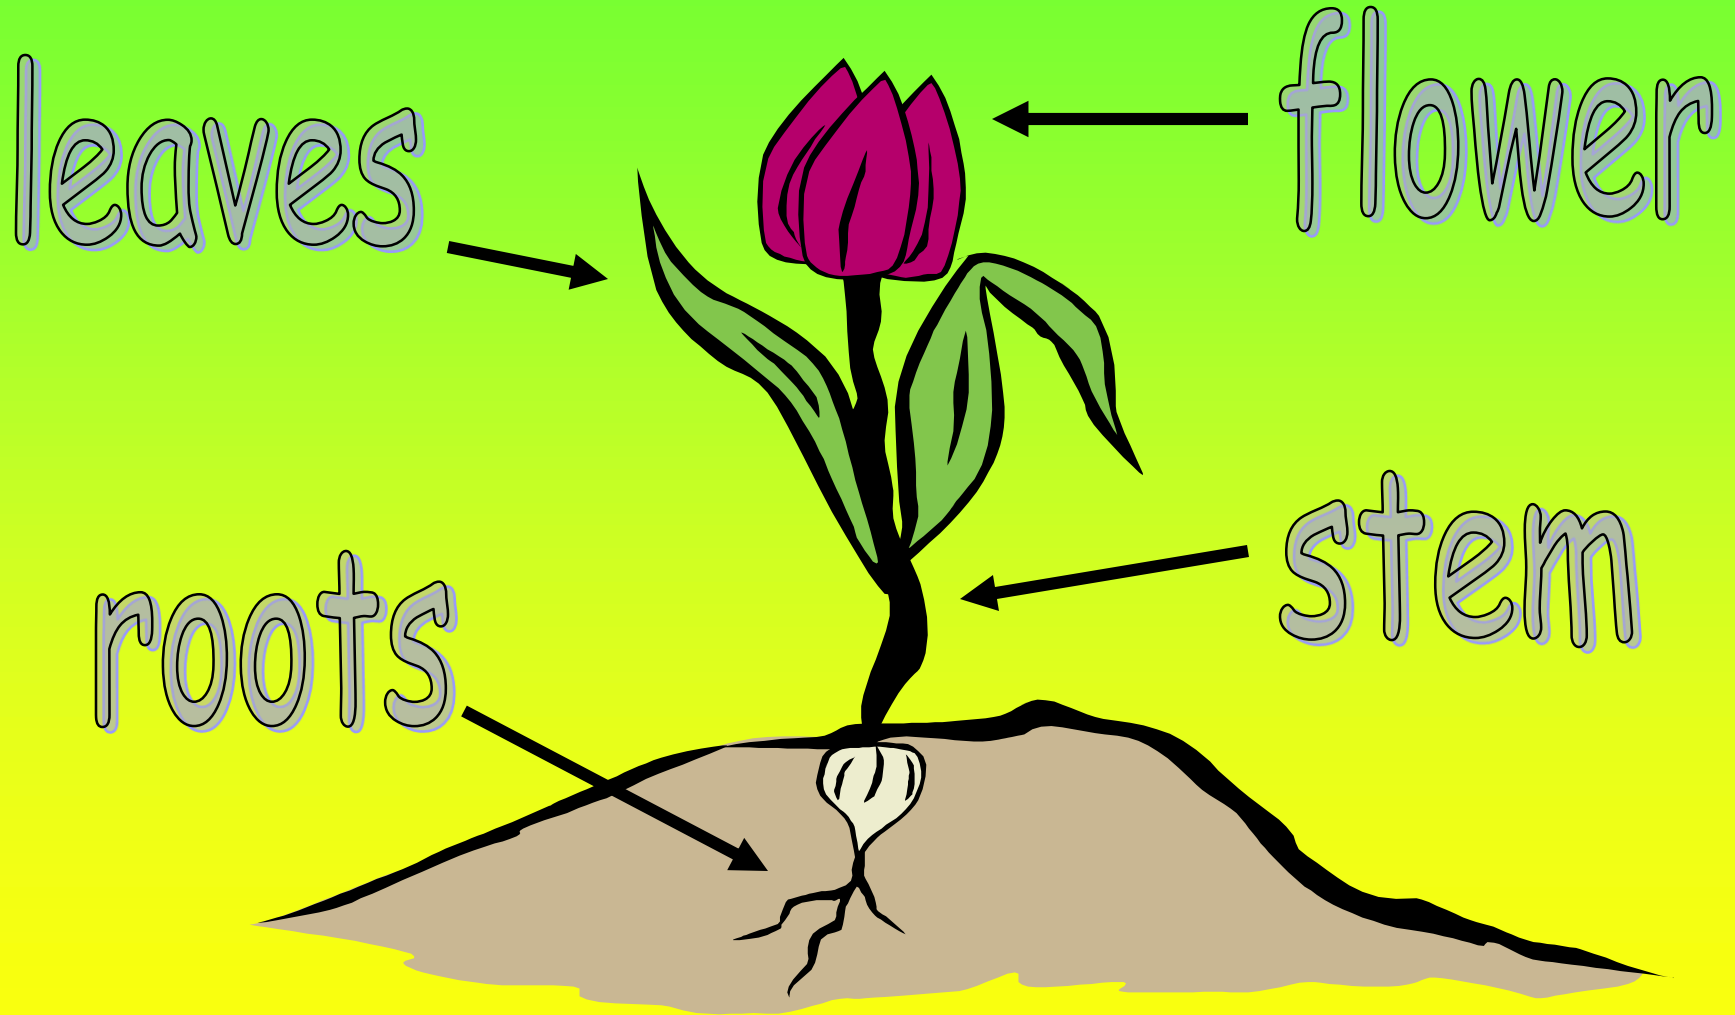

1. Roots

2. Stem

3. Leaves

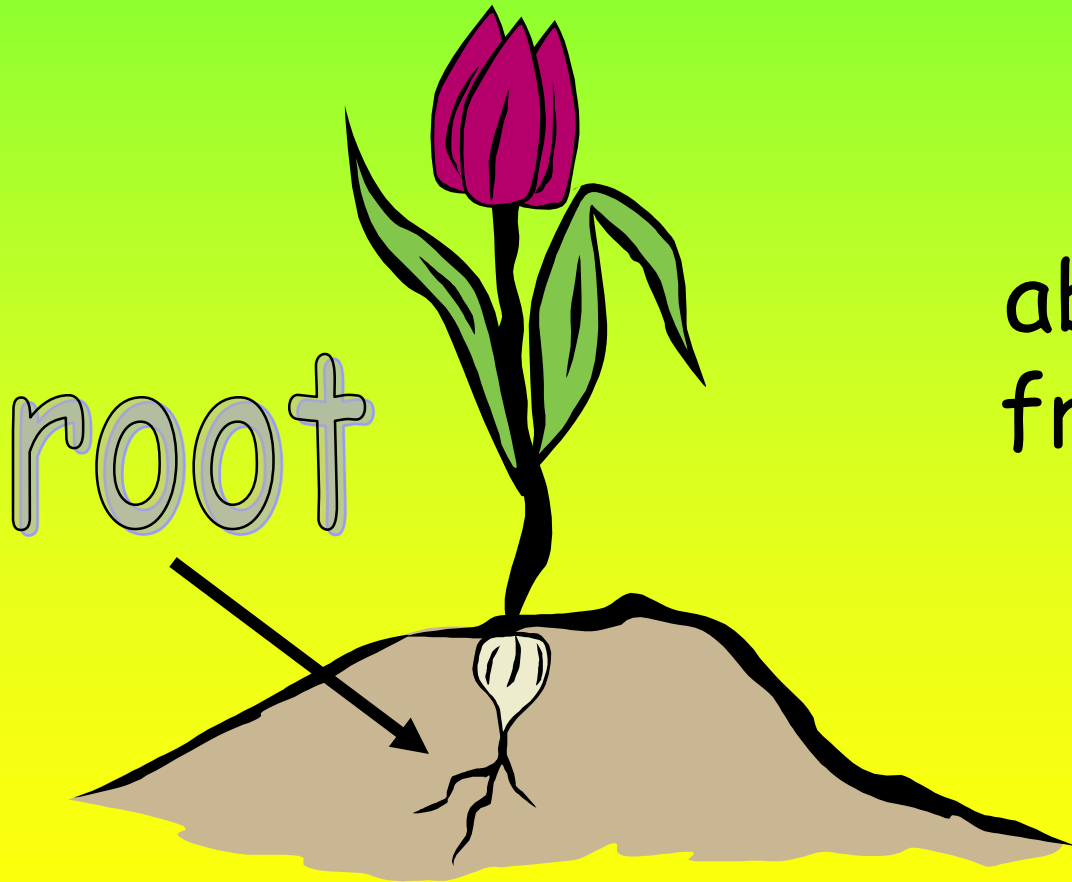

4. Flower

Look at this picture.

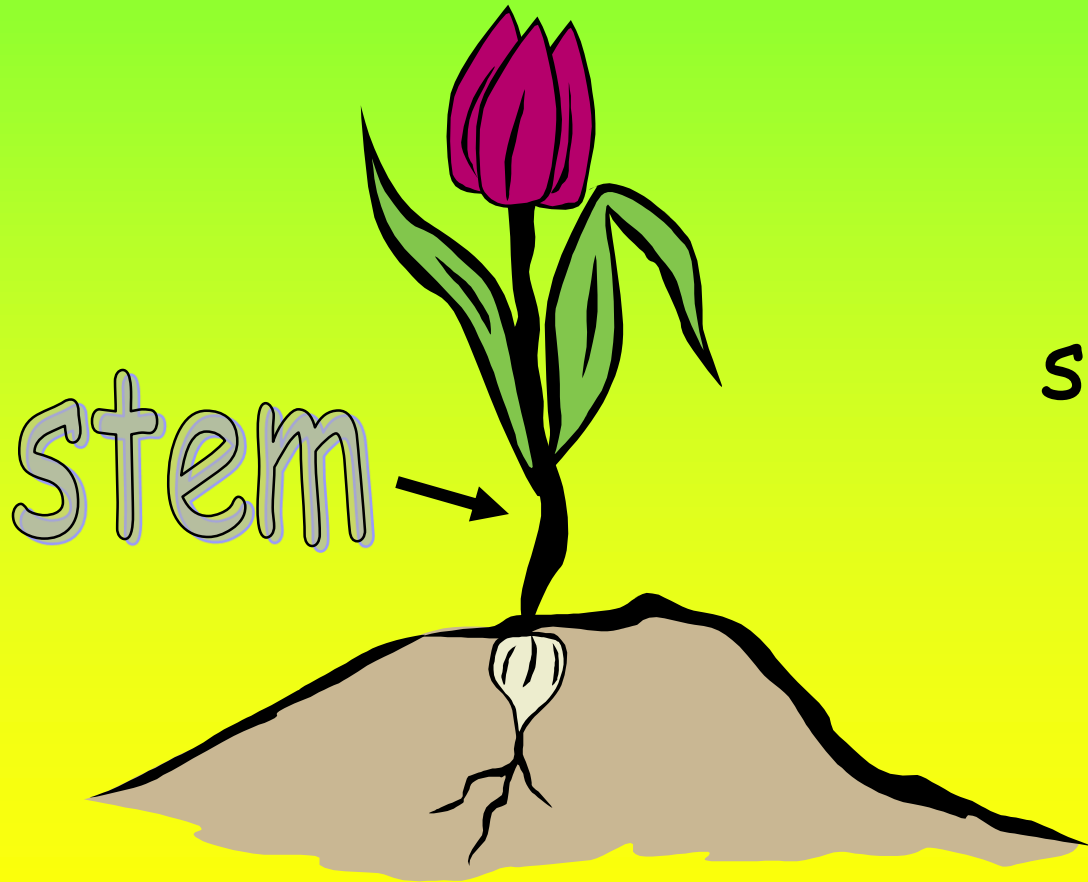

Can you label the parts of the plant?

What is the function of the root?

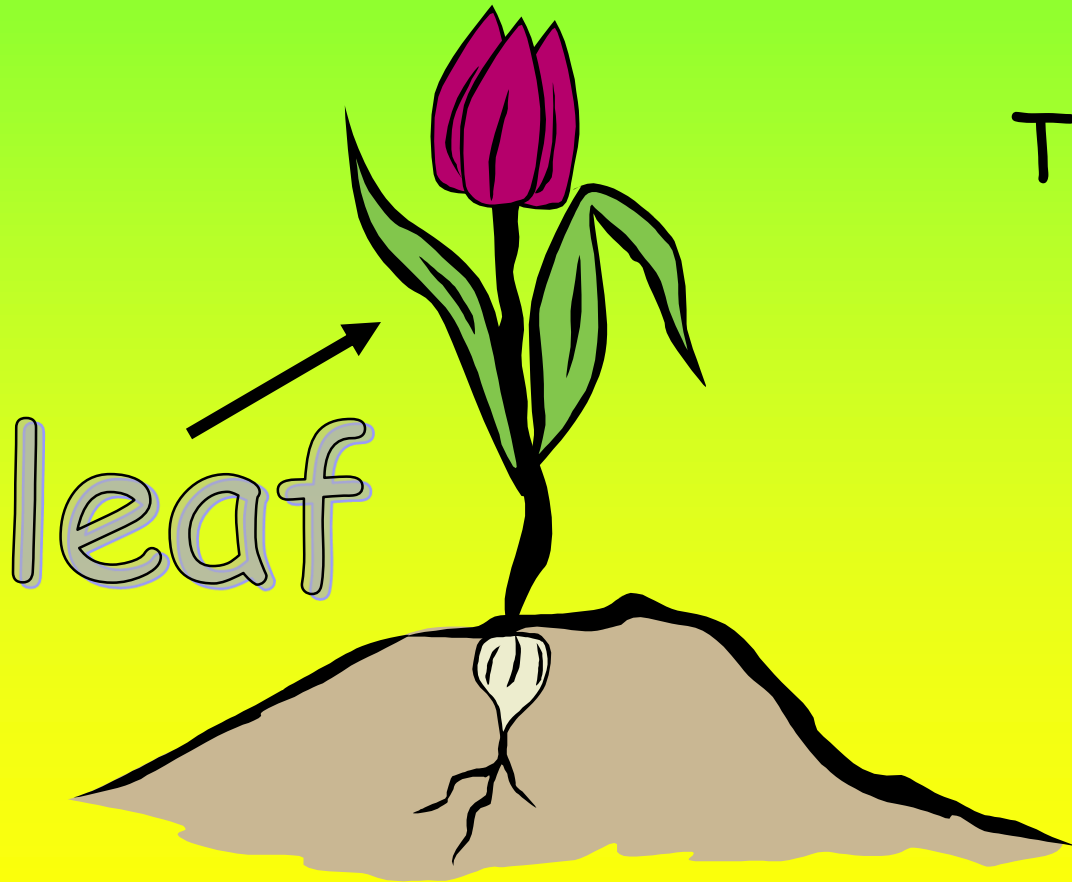

The roots
absorb water
from the soil.

What is the function of the stem?

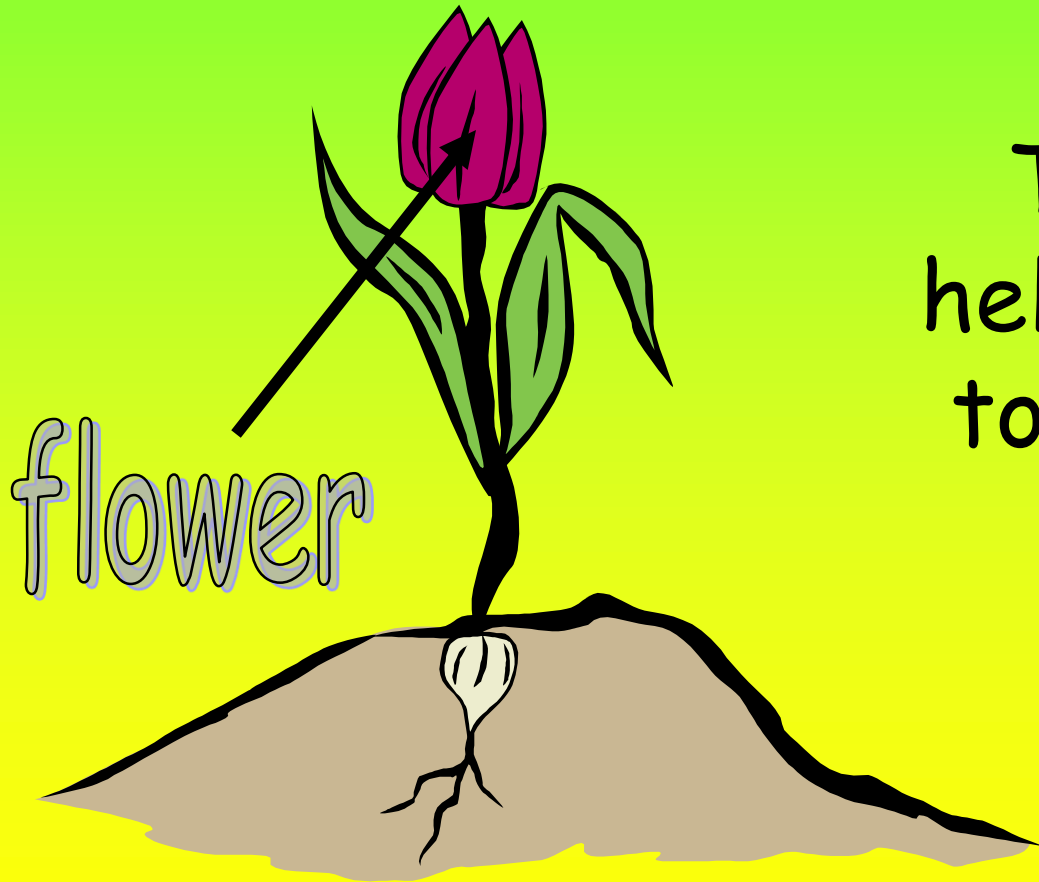

The stem
helps to
support the
plant.

What is the function of the leaf?

The leaves use sunlight to provide the plant with energy.

What is the function of the flower?

The flower helps the plant to reproduce.
