

You will need:

- Three clear cups labelled “stems” leaves” and “petals”
- Parts of flowers (wild ones are fine)

- 1) Set some examples in the cups for them before they start sorting don't be tempted to leave out the labels though.
- 2) Encourage your child to sort the parts of the flowers while talking about them. Look at the different types of leaves there are and smell the different petals before sorting. Remember to point to the word and say it whilst sorting them and highlight the first word and say it using a phonic sound.
