

How can I use this with my children?

Cut out the time cards and mix them up. One player randomly selects and reads out a time card time while the other players check the clocks on their boards, crossing out a clock if it matches. Alternatively, you could ask your child to match the time cards to the correct clocks on one of the boards.

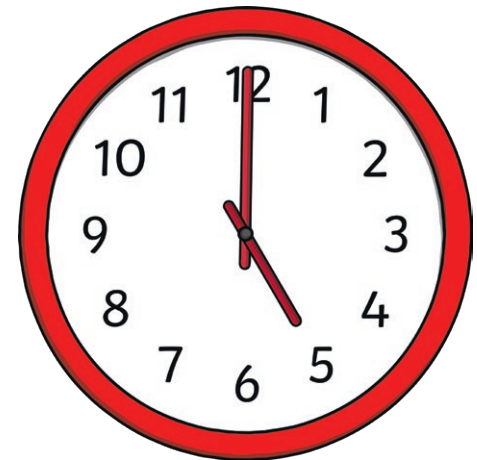

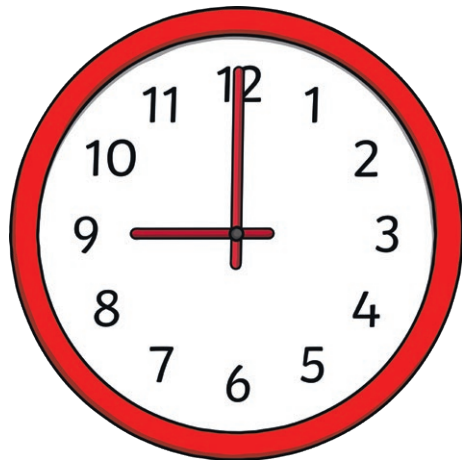

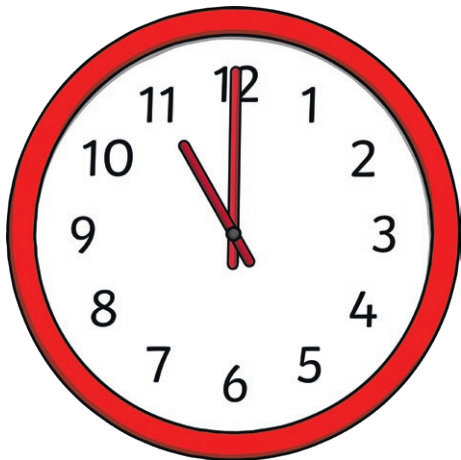

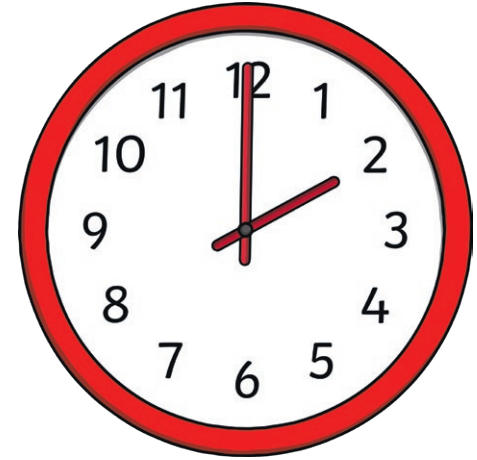

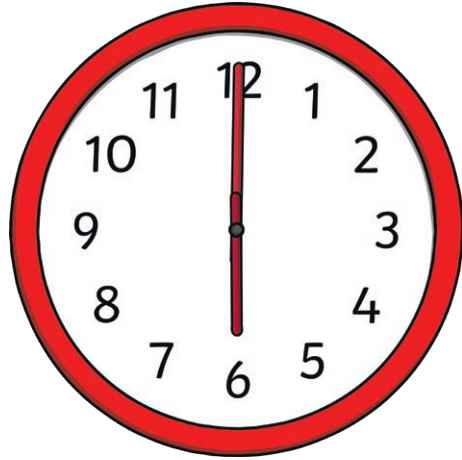

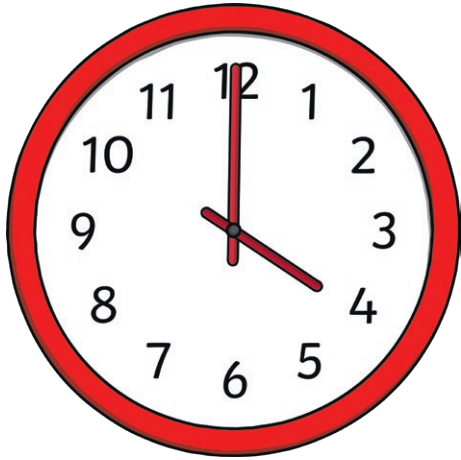

How does this help my children's learning?

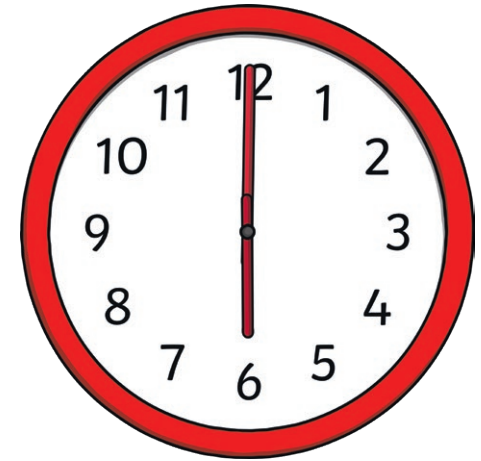

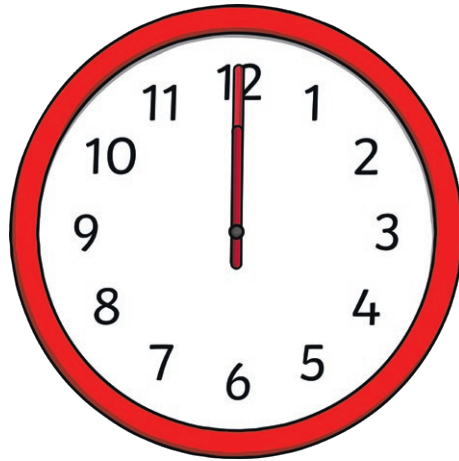

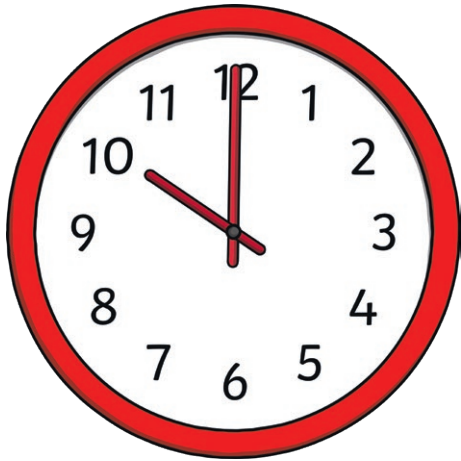

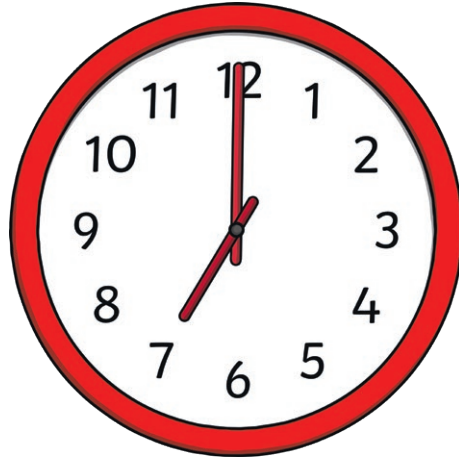

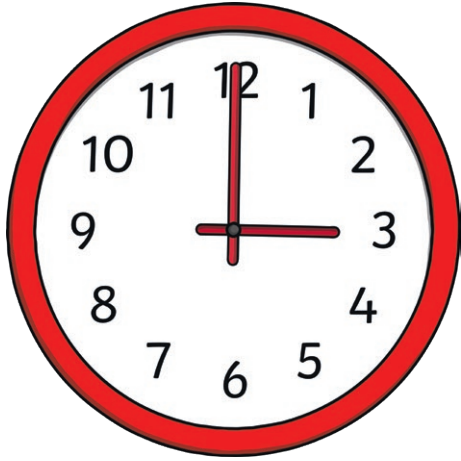

In year 1 (ages 5 to 6), children are introduced to the concept of hours and minutes and will practise reading o'clock times on an analogue clock. This game can help to reinforce key learning in this area.

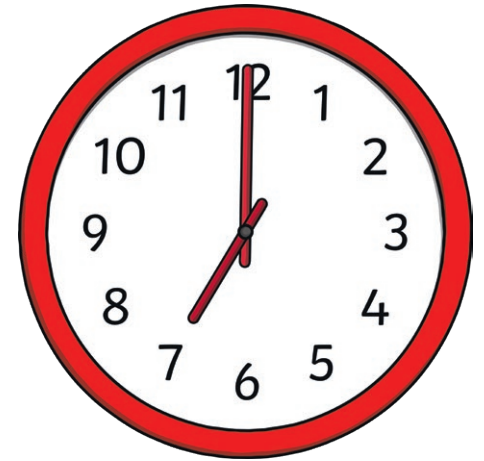

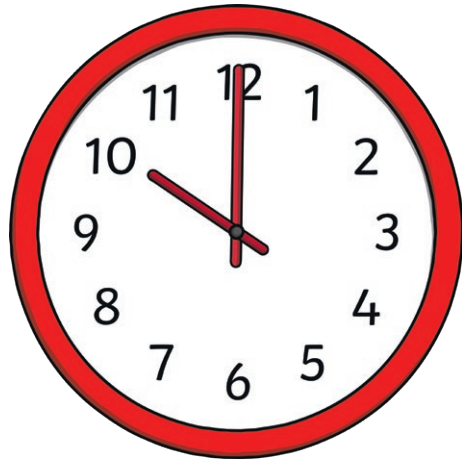

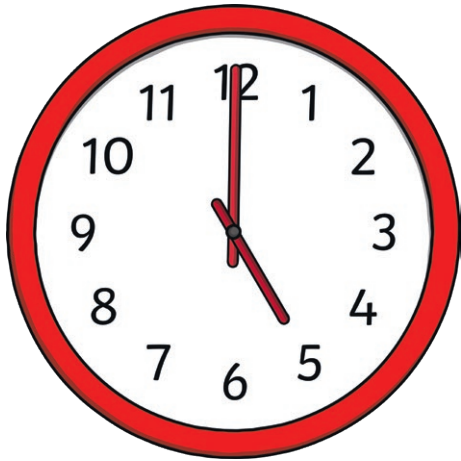

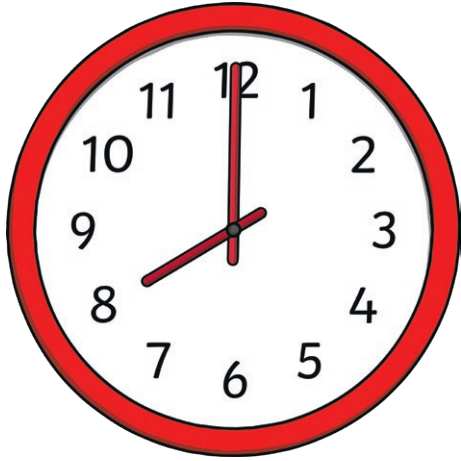

Ideas for further learning:

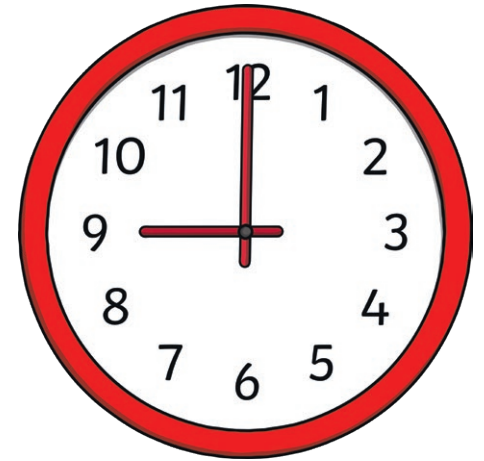

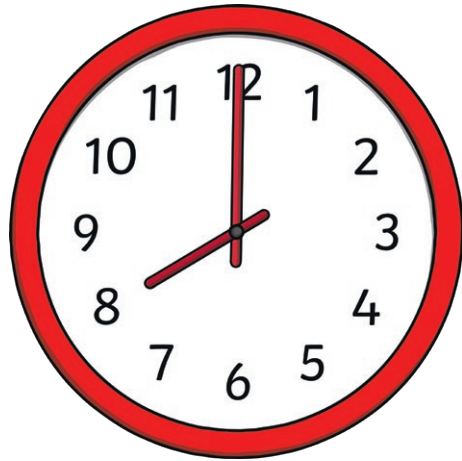

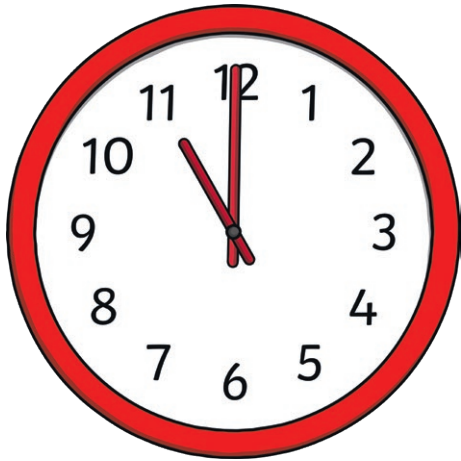

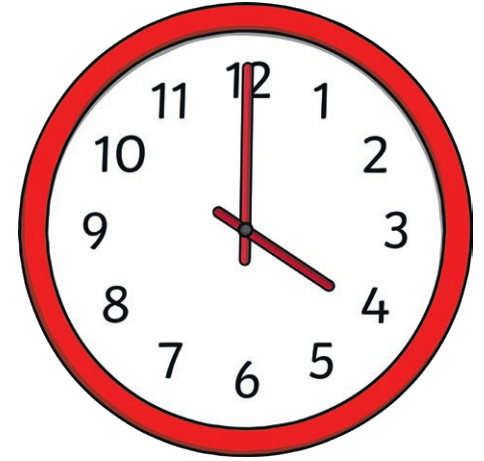

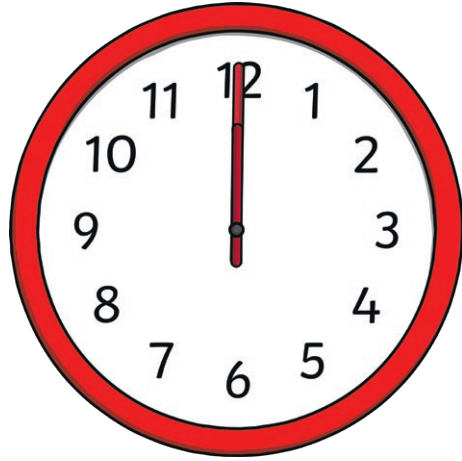

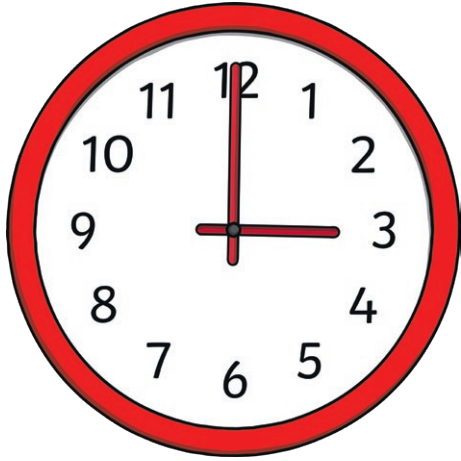

Use an analogue clock to encourage your child to read the o'clock time then move on to read half past, quarter past and quarter to the hour.
