

# Maths Activities.

## Week 9.

When you go out on your daily walk, take a note pad and a pencil with you. Take a note of all the numbers that you see.

Think about numbers on houses, at the bus stop, on the post box. When you get home, you will have some work to do with them.

1. Can you put all your numbers in numerical order?
2. Can you make a list of the numbers that are one more/less than you list?
3. Group two numbers together and make a total.
4. If you have two digit numbers can you partition them. Use the power point to remind you how to do this.
5. Use the Counting Houses power point to help you count to 20.
6. Can you group your numbers into Odd and even numbers?

Good luck, hope you get on ok. Looking forward to seeing your work.
