

## Maths week 8 – Sharing

### Notes for Parents

This week we are looking at sharing. This activity can be adapted to suit your child.

Some children could share something with the adult working with them doing this regularly to make it a secure concept.

Some children can share a small number of objects with a small number of toys and count how many each gets when the objects are shared out.

Others can have a go at writing the number sentences and use bigger numbers as well as understanding that sometimes things cannot be shared out equally so there will be a remainder (some left over).

I hope you enjoy doing this activity with your child. Thank you for your work.
