

Making a Bird Feeder

You will need

- Popcorn (either plain ready made or ask an adult to help you make some with nothing added)
- String
- A large needle
- Somewhere to hang your bird feeder

What you need to do

1. Make popcorn or use plain ready-made popcorn.

2. Thread some cotton on a needle.

3. Thread a piece of popcorn on, tie the end of the cotton on, leaving a length of cotton free to tie it up.

4. Thread popcorn on until string is full.

5. Attach somewhere in the garden or on a tree or window outside. The one in the picture is on a fence.
