

Week 7: Maths

In Maths this week we are going to continue to think about money. Have you

listened to me reading the 'What I like!' poem?

Activity 1: Sensory activity: Hide coins in different materials like flour, rice, shaving foam,

orbeez. Use your hands or a magnet to find the coins.

Activity 2: Create your own ice cream shop at home using real ice creams or the worksheet

provided. Count out the coins to the correct price or add the coins on the worksheet to

find out how much each ice cream costs.

Activity 3: How many different ways can you find to pay for an ice cream that

costs 20p? **Extra task:** You could create your own coins at home based on your

favourite person or character.
