

Bubbling Magic Potions

Science Experiment

Method

1. Begin by placing the bowl or cauldron onto the tray – this will make clean up easier!
2. Then pour some vinegar into the bowl/cauldron.
3. Next, stir in some food colouring or powder paint.
4. Then add a squeeze of washing up liquid.
5. Next, sprinkle in some glitter and sequins.
6. Then add some bicarbonate of soda and stir the mixture with your magic wand or spoon.
7. Watch what happens as your potion begins to fizz and bubble!
8. Continue adding bicarbonate of soda, washing up liquid and vinegar to continue the reaction. Try adding different coloured powder paint or food colouring too! Bubble bath could also be used instead of washing up liquid.

You will need:

Bicarbonate of soda (also known as baking soda)

Distilled white or malt vinegar

Washing up liquid

Food colouring or powder paint

Glitter and sequins

A bowl or plastic cauldron

A magic wand or spoon
