

Week 13: Maths

In Maths this week we are going to be thinking about big/small and

measurement: length and width when looking at footprints in the mud, our own,

our families and animal footprints. Have you watched Elaine's 'Smelly Book' story

video?

**1** Go on a sensory mud walk. Count the footprints as you make them

and compare the size of yours and your families using big/small.

**2** Go on a sensory mud walk. Measure and compare the length and width of

your own, your families and different animals footprints that you come across. You could

measure the footprints using cubes, the same sized twigs or a ruler.
